WAGONS "R" US

YOU HAVE BEEN LOOKING FOR AN EASIER WAY TO HANDLE LARGE ROUND BALES

Here it is! A big bale carrier with quick attach 32 ft. feeder panels! Side panels slide out to 11 ft. wide and swing open for EZ loading.

Low profile 1200 x 12, 10 ply flotation tires for low comfortable feeding. Panels swing open for loading with 3 point hitch or front loader.

Cattle are well fed when winter pasture is snow covered! Cattle have 66 ft. of all around feeding area for hay, straw, or corn stalks.

Five days later ... and ready for a refill! Side panels slide in to 5-1/2 ft. width as cattle push toward center. Photo shows total clean up except for a few scattered corn stalks.

NEW:

Revolutionary bale carrier hauls bales all summer and feeds hay all winter. The rugged unit has 16,000 lb. capacity and is equipped with E-Z Trail's long life steering that won't "wag". Cattle simply push the sides together from 11 feet to 5-1/2 feet wide as they empty the feeder. The patented concept allows the feeder panels to slide freely, even if one end feeds ahead of the other. You can feed any size round or square bales without any waste. Cows clean up any loose hay falling through the cradles before it is trampled on leaving no hay on the ground! Owners say they have saved enough hay & labor in one year to pay for their carrier/feeder. It's a survival technique when feed costs are high, and meat and milk prices are low. Before you consider herd liquidation, try the carrier/feeder on your farm. It's a rugged hired hand that will serve its lifetime for mere room and board.

"Since I have another full time job, I can't spend much time with my cattle. My bale feeder will feed 50 cows for about 5 days. It is hard to believe how well they clean up everything. Because of the drought last year, I am short of hay so I loaded 8 bales of wheat straw – when I checked on my cows later it was all cleaned up! There wasn't enough left to tell whether they were eating hay or straw."

B.A. Mantua, Ohio

Warning: Proper lighting is required when used on public highways.

Dear Sir:

Testimonials from cattlemen and "women" are saying their CF890 Bale Carrier Feeders are saving enough hay and labor to pay for themselves the first year!

Robert Keutz from Alpena, MI, says

"he has less waste from 8 bales than he had from one bale in a ring."

Sam Mabry from Simpsonville, SC, says

"the Bale Carrier Feeder has cut his chore time in half."

The patented two-in-one CF890 has 22 ft. long feeder panels that slide out to 11 ft. wide when loaded. The panels then slide in to 5-1/2 ft. empty width as the cattle press toward the center while feeding. Special hinges allow panels to slide freely, even when one end slides ahead of the other.

- 1) The bale feeder loads easily without opening the side panels when using a front-end loader and a bale spear.
- 2) The side panels hinge on one end and swing open with a Dolly wheel for loading with a 3-point rear bale spear.
- 3) ...Or they are easily removed by pulling just one pin when used strictly as a bale carrier.

Four bale cradles are provided to feed up to eight 5 ft. or six 6 ft. bales at one time. The self-cleaning cradles eliminate spoilage from mold or mildew. Cattle can clean up any loose hay that may fall through the cradles before it is trampled or wasted.

The spring assisted "E-Z Hitch" tongue pins up out of the way to stay clean from manure droppings, or to prevent freeze-down during winter.

The feeder has 16,000 lb. capacity, a 90" wide wheel tread, and comes with low profile 2600 x 12 in. 12 PLY flotation tires. It is built for long life outdoor use; vital components of E-Z Trail's accurate steering are weather protected.

The most regrettable testimonials we have are from people who wish they had known about the Dual Purpose Feeder before they bought more expensive feeders that have less capacity, are not self-cleaning, and cannot be used as a bale carrier.

We are doing everything we can to make the Feeders available to you at a factory direct price of _____ each. If you are seriously interested in saving hay and labor, please call again. We can arrange delivery and financing on the Bale Carrier Feeder that is saving cattlemen and "women" thousands of tons of hay nation wide.

Sincere thanks,

Abe Kuhns

E-Z Trail CF890 Round Bale Carrier/Feeder Testimonials

“My Bale Carrier/Feeder is a real Hay Saver! The way they clean it all up is hard to believe. Even underneath there is no hay left on the ground.” M.M., Goodland, IN

“It’s easy to keep hay out for my cattle with the bale self-feeder. It is a nice outfit. I don’t have to worry when there is snow on the ground. My neighbors are impressed with it too.” B.W., Wayland, MO

“I really like my Bale Carrier/Feeder. It pulls nice and handles well. It doesn’t waste much hay. Everybody that has seen it is impressed. I wish I had a couple more; it’s just fabulous!” J.T., Austin, TX

“It works great! My bales are small, so it took 14 bales to fill it, and they hardly wasted any at all. I am well satisfied and would recommend it to anyone interested in one.” D.B. Rising Sun, IN

“The concept is terrific. I am a cattlemen who farms alone. I also represent New York on the cattlemen’s beef board and am a NCA Committee vice chairman. The Carrier/Feeder is the answer for feeding my cattle, especially when I am away for 5 or 6 days at a time.” E.S., Cameron, NY

“Hauling and feeding round bales with the Carrier/Feeder saves hay and makes my job so much easier that I am going to replace all my portable bunk feeders” W.W., Glen Haven, WI

“It’s the smoothest and straightest trailing wagon I have ever used since you have eliminated all wear points in your steering. I recommend that you don’t tell anyone your secret.” J.D., Fairfield, NC

“We had such a rough winter in `93-94 that I had to use 2 CF890’s to keep my cows fed. Winter or summer it’s a good working all-purpose trailer. We haul our bales quite a distance. I wish it were 3 feet longer, then I could haul 12 big bales. It has plenty of strength.” L.D., Gary, SD

“We bought two Apache portable bunk feeders before I saw the E-Z Trail CF890. We can’t haul hay with them and can only feed 4 bales at one time. Now that I bought one CF890 I can haul eleven bales or feed eight bales at one time. I want to get another one as soon as I can.”

Joe Catoe, Jefferson, SC

“My neighbors look on with envy when they see me haul eleven bales or feed eight bales at one time. I have cut my chore time from one half day to two hours.” Sam Mabry, Simpsonville, SC

“The Bale Carrier/Feeder is the best thing I ever bought for my farm. I really love it and like to tell other people about it.” A.M. Berryville, VA

“IT’S HARD TO BELIEVE, my cows waste less hay feeding eight bales...than from one bale in my other feeders!” R.K. Hubbard Lake, MI

FROM: Seyer Farms *David Seyer*
PO Box 876; Dexter, MO 63841

Greetings from Southeast Missouri! Abe Kuhns, from E-Z Trail, asked us to write about our bale feeders. We own eight (8) round bale carrier/feeder wagons, for our 500 cow/calf operation.

We bought three feeders a few years ago and they were so helpful we ordered more. Features we like include:

- Can travel with eight (8) large round bales.
- Feeds six (6) large bales with hardly any waste; the cows push the side bars in as they eat up the bales.
- The sides open for easy loading of six (6) bales.
- The hitch extends out for easy hook-up.
- The tongue pins up to stay out of the mud.
- There's plenty of room for many cattle/calves to eat at the same time.
- It's a wagon so we can load up at our hay supply and easily pull a load to any pasture we desire.

My wife and kids can load these wagons. We really like the E-Z Trail design and an added benefit is they are not as expensive as their competitors.

I hope we've been helpful to your research. Your welcome to come see them in action. We are located 2 ½ hours south of St. Louis. Our phone number is 573-624-5640.
