Adjusting a 600 Lb. upper rest bar is no longer a back-wrenching job...

Farmers & dealers are having a "fit" with E-Z Trail's tricycle front, heavy duty Header Transport. Standard features include: two adjustable 7000 lb. torsion axles, 4-wheel electric brakes, deluxe LED lighting, E-Z Lift telescoping tongue, safety chains, and best of all, the patented acme screw crank adjustment for the heavy upper rest bar.

A dealer testified hauling 4 different models of grain & corn heads one morning by himself. Readjusting the upper bar 4 times with the E-Z Handcranks to a "perfect fit" was quick and E-Z, without removing any bolts, pins, or clamps, or "wrenching" his back. (it's anti-chiropractor!)

E-Z Trail Header Transports are available in three sizes: 37', 42' & 48'. Color choices are Red or Green.

You can rest assured if your header is well secured!

LED Lighting: better visibility day & night

The slider torsion axles soften the ride & can make way for gauge wheels, while the rear brakes decrease jack knife potential when unexpected hard braking occurs

Center pivot equalizes load weight and shock for dolly wheels over dips, bumps & rough terrain

Hook-up time & effort is reduced with the E-Z Lift spring & telescoping tongue

Tie-downs are standard

Lower rest: the two-way slider bracket easily accommodates a wide range of header styles without needing special brackets

One hand can move the 600 Lb. upper rest bar

Specifications	Model GC37	Model GC42	Model GC48
Upper Rest Bar	37'	42'	48'
Carrying Capacity	14,000 lbs	14,000 lbs	21,000 lbs
